

widget

```
classDiagram
    gesture_layer --|> widget
```

A UML class diagram showing an inheritance relationship. A box labeled 'gesture_layer' is at the bottom, and a box labeled 'widget' is at the top. A vertical line connects the bottom of the 'gesture_layer' box to the bottom of the 'widget' box. At the point where the line meets the 'widget' box, there is a small, hollow, upward-pointing triangle, which is the standard notation for inheritance in UML.

gesture_layer
