

widget

```
classDiagram
    container --|> widget
```

A UML class diagram showing inheritance. A box labeled 'container' is at the bottom, and a box labeled 'widget' is at the top. A vertical line connects the bottom of the 'container' box to the bottom of the 'widget' box. At the point where the line meets the 'widget' box, there is an open triangle pointing upwards, indicating that 'widget' inherits from 'container'.
